Residents immediately affected are advised to close the main water valve in their homes and DO NOT attempt to use any water during swabbing hours. This is important to avoid drawing a piece of foam swab into your service and blocking it.

We ask that you re-open the main water valve in your home after swabbing is complete and turn on a cold water tap (laundry tub if possible) and let it run to flush any residue that may be left in your water service.

Residents not in the swabbing area could experience dirty water. If you experience dirty water, let your cold water run and it should clear up. If dirty water persists, please call the municipal office.

Should you experience any problems with your water service please call the municipal office.
